

20m Pneumatic Hose on Reel INVENTO

A pneumatic hose of 20m length on an automatic retractable reel. The hose is equipped with standard nipples with 1/4" male thread.

Description

INVENTO Pneumatic Hose Reel

The INVENTO brand pneumatic hose reel is an essential automatic reel for powering pneumatic tools. It is indispensable in any workshop or production facility. This durable reel features a solid construction and is equipped with a robust casing that provides excellent protection for the hoses and ease of use. The pneumatic hose is flexible, resistant to high and low temperatures, stretching, and exposure to aggressive chemicals. The included mounting kit enables quick and easy installation. A special mechanism allows the hose to lock, ensuring efficient and safe operation. The automatic spring-driven rewind system quickly and smoothly retracts the hose, preventing kinks and tangles.

Safety: Hose reels help keep hoses neat and organized, eliminating loose hoses on the floor, which can pose

a tripping hazard. This reduces the risk of accidents in the workplace, especially in industrial and workshop environments.

Durability and Longevity: Automatic reels protect hoses from mechanical damage such as abrasions, kinks, and tears that can occur when hoses are left loose. This extends the hose's lifespan and reduces the risk of failure during use. Regular use of reels prevents hose damage, which prolongs their lifespan. This means hoses need to be replaced less frequently, lowering operational costs and increasing financial efficiency.

Efficiency and Ergonomics: Reels facilitate quick and efficient unwinding and rewinding of hoses, allowing for more effective time management. Workers can focus on their tasks without the need for manual hose handling, which also reduces the risk of improper hose usage. Automatic reels reduce the physical effort required to wind and unwind hoses, decreasing worker fatigue and the risk of injuries from repetitive motions. Better working conditions translate to higher productivity.

Workplace Organization: Reels help maintain order in the workplace, increasing operational efficiency. Neatly wound hoses not only look aesthetically pleasing but also minimize clutter and facilitate access to other tools and materials.

Advantages:

- **Durable Construction:** Made from high-quality materials, resistant to harsh conditions and frequent use.
- **Versatile Mounting Options:** Can be easily mounted on walls, ceilings, or floors, providing flexibility in various work environments.
- **Increased Safety:** Keeps hoses neatly stored, reducing the risk of tripping and clutter in the workplace.
- **High Pressure:** Supports up to 150 PSI, suitable for various pneumatic tools and applications.
- **Ease of Use:** Equipped with a hose guide system for neat retraction and a slow retraction mechanism for safety.

This hose reel with a pneumatic hose is ideal for automotive workshops, industrial environments, and any workplace requiring a reliable and durable air hose management solution.

Technical data

5906288303466

- Brand: INVENTO
- Casing Material: PP
- Casting Color: red-black
- Hose Length: 20+2m
- Hose color: red
- Hose Material: PVC
- Hose Size: 3/8"(9.5 x 15.8mm)
- Fitting: 1/4"BSPT male thread
- Working Pressure: 150psi (10 bar)
- Bursting pressure: 450psi (30 bar)
- Working temperature: -5°C to + 55°C
- Bracket (plastic) and screws are included
- Size:51*27.5*47cm
- G.W.:11kgs
- N.W.:10kgs
- Smoothly rewind the hose automatically.
- Automatically locks at every 5cm
- Slow retraction and free stop
- Hose guide system
- Wall mounted and 180 swivel
- CE & ROHS Approval
- Manual included

12 mc
