

INVENTO VBS 110 (Cube) - hand-spin mobile wheel balancer with 2D automatic gauge alu

INVENTO VBS 110 (Cube) is a compact mobile wheel balancer designed for workshop and on-site service use. Automatic gauge included.

Description

INVENTO VBS 110 (Cube) is a compact mobile wheel balancer designed for workshop and on-site service use. Wheel parameters are entered manually as standard, and for faster workflow the unit can be upgraded with an **2D automatic gauge arm** (automatic **wheel diameter** and **distance on the shaft** input).

A **tripod stand is included** for stable setup. For true mobility, we recommend adding a **power bank**—power-bank supply is enough to operate the unit away from the workshop during mobile service jobs.

Default set: Tripod stand, Calibration weight Weight hammer Shaft key Shaft 40mm Shaft bolt Small cone Medium cone Type-C cable Power charger EU Hook I Hook II Rotation Quick nut

Technical data

5906288321477

Parameter	Value
Wheel width input	manual
Wheel diameter input	manual / automatic (optional)
Distance on the shaft	manual / automatic (optional)
Laser weight placement indicator	no
Grip type / mounting method	nut
Shaft	40 × 3 mm
Screen/monitor type	LED
Wheel positioning at unbalanced point	no
Work area lighting	no
Brake type	no
Rim diameter range	10"-20"
Max. wheel diameter	558 mm
Max. wheel width	300 mm
Max. wheel weight	65 kg
Easy weight (fewer weights)	no
Split weight (hide weight behind spokes)	yes
Motorcycle wheel balancing program	yes
Machine weight	26 kg
Warranty	1 year
Index	KON-INVBS110
Included	automatic gauge arm: INVBS-AG110
Included	tripod stand, Calibration weight Weight hammer Shaft key Shaft 40mm Shaft bolt Small cone Medium cone Type-C cable Power charger EU Hook I Hook II Rotation Quick nut

Warranty: 12 months
