

INVENTO Manual oil extractor pump 9L

Lightweight, portable and compact 9L handheld suction/water washer.

Description

Lightweight, portable and compact 9L handheld suction/sinker

It is designed to suck oil or other operating fluids from tanks in vehicles, machines and devices, and from other places where it is necessary.

Dedicated to passenger cars, trucks, agricultural vehicles and machines, power generators...

Specification:

- 4 suction probes of different diameters, including one metal
- sucking the oil directly from the engine ensures a clean and quick oil change
- capacity 9L
- low weight and small dimensions
- suitable for oils and other fluids

It will work in car, mechanical, locksmith and installation workshops, as well as in a home DIY workshop.

The device is used to suck low-viscosity liquids, such as power steering fluid, brake fluid, cooling fluid.
